Excerpt from Advice to Purchasers of Horses: Being a Short and Familiar Treatise on the External Conformation of the Horse; The Nature of Soundness Unsoundness; And the Laws Relating to Sale and Warranty; With Copious Directions for Discovering Unsoundnesses Prior to Purchasing There is no species of traffic in which the purchaser runs greater risk, exposes himself to more imposition, and experiences more disappointment, than in that of horse-dealing. There is none in which so little confidence is placed in the seller; and, generally speaking, there is none in which greater ignorance is displayed by both, in judging of the soundness of the commodity. The buyer inquires is the horse sound? the seller replies warranted sound, and makes himself responsible for it by giving a written certificate. As the word sound forms such an important part of the contract, we might expect that its meaning would be well defined, and clearly understood in the same sense by both parties.
