

Human Parasitology

By Fatik Baran Mandal

PHI Learning, 2011. Softcover. Book Condition: New. First edition. This well-organized book discusses the morphology and life cycle of human parasites, as well as the mode of transmission, incidence, symptoms, diagnosis, treatment and prevention of parasitic diseases. It also explains the concept of zoonotic diseases, adaptive features and disease management in light of recent studies. The book emphasizes the evolutionary and eco-physical aspects of human parasites and shows how parasitic infection spreads today. The book is intended as a text for the undergraduate and postgraduate students of Zoology and Life Sciences. In addition, it would also be highly valuable for public health workers and health professionals. **KEY FEATURES :** Explains the life cycle of each parasite with the help of diagrams. Deals with newly discovered parasites such as *Cryptosporidium parvum* and *Cyclospora cayetanensis*. Discusses the emerging food-borne, water-borne and vector-borne diseases. Contains a glossary of important terms related to human parasitology. **Contents**

Reviews

Complete information! Its this kind of good study. This really is for all those who statte that there was not a well worth looking at. I found out this pdf from my dad and i encouraged this ebook to learn.

-- **Candida Deckow III**

Most of these ebook is the best publication available. It is definitely simplistic but unexpected situations within the 50 percent of the book. You will not sense monotony at at any moment of the time (that's what catalogs are for relating to in the event you request me).
